

QUARTERLY REPORT MARCH 2022

Odin Metals Limited (**Odin, ODM** or the **Company**) is pleased to report on activities undertaken in the March 2022 quarter and its financial position at the end of the period.

Odin re-commenced drilling at the Koonenberry project in February 2022 with a plan to drill a minimum of 5,000m RC drilling as well as diamond core drilling initially targeting Grasmere, followed by Cymbric Vale and Wertago.

In February 2364 metres (15 holes) of RC drilling was completed with assays pending, expected to be received shortly.

Review of the HeliTEM data completed over the area in 2022 and historical EM surveys that were completed over a small section of the trend have identified open anomalism that is yet to be drill tested took place during the quarter. Odin now plan to fast track an Electromagnetic Survey and Geochemical Survey over Grasmere and Cymbric Vale that will aid further drilling.

Cymbric Vale

Drilling at Cymbric Vale targeted significant copper mineralisation intersected in two shallow (<30m) historic RC exploration holes drilled 600m apart and a large circular HeliTEM anomaly located to the south known as “Big Mother”.

Drilling completed at Cymbric Vale intersected significant mineralisation in the majority of holes with a deeper hole completed to the north of the most southern hole intersecting visual Copper sulphide mineralisation (CV0010). Drilling returned significant mineralisation including:

- **11m @ 1.90% Cu from 35m – Hole CV0006**
 - Incl. 6m @ 3.20% Cu from 37m²
- **7m @ 1.08% Cu from 48m – Hole CV0004**
- **10m @ 0.88% Cu from 11m – Hole CV0002**
- **13m @ 0.77% Cu from 13m – Hole CV0008**
- **8m @ 0.76% Cu from 15m – Hole CV0003**

ODM plans to extend the scout programme completed at Cymbric Vale in upcoming drilling, focussing on sulphide copper mineralisation and extending drill coverage to the north of the recent drilling where a recent HeliTEM survey identified potential sulphide mineralisation.

Grasmere

Drilling at Grasmere targeted:

- Potential expansion of the current resource both along strike, down dip and infill,
- Scope the potential of intersected higher-grade mineralisation to lift the underlying grade of the resource, and to
- Provide confidence in previous drilling at the Grasmere deposit and the reported JORC (2004) resource of 5.75 million tonnes grading 1.03% copper, 0.35% zinc, 2.3 grams per tonne silver and 0.05g/t gold.

Drilling completed by ODM intersected significant mineralisation in the majority of holes, intersecting visual copper sulphide and oxide mineralisation. Drilling returned significant mineralisation, including:

- **8m @ 1.62% Cu, 0.12g/t Au, 3.64g/t Ag** from **83m – Hole GS0003**
- **5m @ 2.72% Cu, 0.07g/t Au, 3.94g/t Ag** from **96m – Hole GS0008**
- **2m @ 3.46% Cu, 0.24g/t Au, 8.40g/t Ag** from **192m (EOH) – GS0012**
- **3m @ 1.70% Cu, 0.05g/t Au, 5.13g/t Ag** from **86m – Hole GS0006**

ODM recommenced the planned RC drilling programme at Grasmere on Monday 14 February 2022, continuing to focus on expanding and confirming the current resource and testing HeliTEM anomalies along strike that were recently identified in a large scale HeliTEM survey undertaken in 2021 that identified potential sulphide mineralisation throughout the northern tenure controlled by Odin.

Drilling completed at Big Mother (CV0011-12), intersected intensive shallow magnetite alteration associated with a mafic gabbro intrusive system. ODM now plans to model the recent HeliTEM data to assess the alteration system and its potential to host an Iron Oxide Copper-Gold (IOCG) deposit and to aid targeting of future drilling.

ABOUT THE KOONENBERRY COPPER PROJECT

The Koonenberry Project is an emerging, district scale, Copper and Base Metals exploration package located 80km east of Broken Hill, New South Wales. The Company considers the Koonenberry Belt to be highly prospective for a number of styles of mineralisation including VMS hosted Cu–Zn–Au–Ag deposits (which is substantiated by the presence of the Grasmere deposit), magmatic Ni-Cu-PGE, epithermal Ag-Pb-Cu and orogenic Au.

The Koonenberry Project covers 2600km² of land holding, ~150km strike of the significantly under-explored Koonenberry Belt which is considered highly prospective for VMS-hosted Cu–Zn–Ag–Au, magmatic Ni-Cu-PGE, epithermal Ag-Pb-Cu and orogenic Au.

Grasmere

The largest copper rich massive sulphide zone identified to date in Western NSW. Grasmere contains an Indicated and Inferred Mineral Resource Estimate reported in accordance with JORC (2004) totalling 5.75 Mt @ 1.03% Cu, 0.35% Zn, 0.05 g/t Au and 2.3 g/t Ag¹.

Grasmere is hosted in a semi continuous mineralised zone over a strike length of 4km and defined by 75 drill holes and is open at depth. EM results confirm higher magnitude anomalism along strike and in proximity to the Grasmere deposit, highlighting the potential association with increased sulphide mineralisation.

Cymbric Vale

Minimal modern exploration has identified significant copper prospectively at Cymbric Vale with a shear hosted Cu system and similar structural and geological setting to Grasmere. EM survey results confirm targets have been identified at Cymbric Vale over >7km of strike and incorporating known copper mineralisation that extends over >1.2km of strike.

Wertago

Historic mining trend, highly prospective for VMS along strike, a further untested anomalous “Western” trend has been identified that extends for over 12km and in includes 2 high priority targets.

CORPORATE

Lapse of Unlisted Options

During the quarter the following unlisted options lapsed in accordance with the terms of which they were issued:

Number	Exercise Price	Expiry
6,200,000 unlisted options over fully paid ordinary shares ¹ .	A\$0.001	3 April 2022
5,200,000 unlisted options over fully paid ordinary shares ¹ .	A\$0.001	26 February 2022

¹ The Option vesting conditions were not met by the holder/s.

Financial Commentary

The Quarterly Cashflow Report (Appendix 5B) for the period ending 31 March 2022 provides an overview of the Company's financial activities. At the end of the quarter, the Company had \$2.2 million in cash. This is considered sufficient to fund corporate costs for the remainder of 2022 and also facilitate further exploration activities.

Expenditure on exploration during the reporting period amounted to A\$310k, including drilling costs of A\$218k. Payments for administration and corporate costs amounted to \$87K and included payments to related parties and their associates of \$64k (refer to Table 1).

Competent Persons Statement:

The information in this report that relates to Exploration results is an accurate representation of the available data and is based on information compiled by Mr Simon Mottram who is a Fellow of the Australasian Institute of Mining and Metallurgy. Mr Mottram is a Director of Odin Metals Limited. Mr Mottram has sufficient experience which is relevant to the style of mineralisation and type of deposit under consideration and to the activity which he is undertaking to qualify as a Competent Person (CP) as defined in the 2012 Edition of the Joint Ore Reserves Committee (JORC) "Australasian Code for Reporting of Exploration Results, Mineral Resources and Ore Reserves". Mr Mottram consents to the inclusion in the report of the matters based on his information in the form and context in which it appears.

Table 1: Payments to Related Parties of the Entity and their Associates

Item	Current Quarter (A\$)	Previous Quarter (A\$)
Directors' Remuneration		
Executive Chairman Fees	30,000	30,000
Non-Executive Director Fees and Superannuation	19,000	19,000
Company Secretarial and CFO Fees	15,000	15,000
Total payments to related parties of the entity and their associates	64,000	64,000

3.8	Dividends paid	-	-
3.9	Other (provide details if material)	-	-
3.10	Net cash from / (used in) financing activities	-	(2)

4.	Net increase / (decrease) in cash and cash equivalents for the period		
4.1	Cash and cash equivalents at beginning of period	2,153	2,929
4.2	Net cash from / (used in) operating activities (item 1.9 above)	(87)	(350)
4.3	Net cash from / (used in) investing activities (item 2.6 above)	(310)	(821)
4.4	Net cash from / (used in) financing activities (item 3.10 above)	-	(2)

Mining exploration entity or oil and gas exploration entity quarterly cash flow report

Consolidated statement of cash flows		Current quarter \$A'000	Year to date (9 months) \$A'000
4.5	Effect of movement in exchange rates on cash held	-	-
4.6	Cash and cash equivalents at end of period	1,756	1,756

5.	Reconciliation of cash and cash equivalents at the end of the quarter (as shown in the consolidated statement of cash flows) to the related items in the accounts	Current quarter \$A'000	Previous quarter \$A'000
5.1	Bank balances	1,756	2,153
5.2	Call deposits	-	-
5.3	Bank overdrafts	-	-
5.4	Other (provide details)	-	-
5.5	Cash and cash equivalents at end of quarter (should equal item 4.6 above)	1,756	2,153

6.	Payments to related parties of the entity and their associates	Current quarter \$A'000
6.1	Aggregate amount of payments to related parties and their associates included in item 1	64
6.2	Aggregate amount of payments to related parties and their associates included in item 2	-
<p><i>Note: if any amounts are shown in items 6.1 or 6.2, your quarterly activity report must include a description of, and an explanation for, such payments.</i></p> <p>- Directors and Officers Remuneration - \$64k</p>		

Mining exploration entity or oil and gas exploration entity quarterly cash flow report

7. Financing facilities	Total facility amount at quarter end \$A'000	Amount drawn at quarter end \$A'000
<i>Note: the term "facility" includes all forms of financing arrangements available to the entity. Add notes as necessary for an understanding of the sources of finance available to the entity.</i>		
7.1 Loan facilities		
7.2 Credit standby arrangements		
7.3 Other (please specify)		
7.4 Total financing facilities		
7.5 Unused financing facilities available at quarter end		
7.6 Include in the box below a description of each facility above, including the lender, interest rate, maturity date and whether it is secured or unsecured. If any additional financing facilities have been entered into or are proposed to be entered into after quarter end, include a note providing details of those facilities as well.		

8. Estimated cash available for future operating activities	\$A'000
8.1 Net cash from / (used in) operating activities (item 1.9)	(87)
8.2 (Payments for exploration & evaluation classified as investing activities) (item 2.1(d))	(310)
8.3 Total relevant outgoings (item 8.1 + item 8.2)	(397)
8.4 Cash and cash equivalents at quarter end (item 4.6)	1,756
8.5 Unused finance facilities available at quarter end (item 7.5)	-
8.6 Total available funding (item 8.4 + item 8.5)	2,153
8.7 Estimated quarters of funding available (item 8.6 divided by item 8.3)	4.4
<i>Note: if the entity has reported positive relevant outgoings (ie a net cash inflow) in item 8.3, answer item 8.7 as "N/A". Otherwise, a figure for the estimated quarters of funding available must be included in item 8.7.</i>	
8.8 If item 8.7 is less than 2 quarters, please provide answers to the following questions:	
8.8.1 Does the entity expect that it will continue to have the current level of net operating cash flows for the time being and, if not, why not?	
Answer: N/A	
8.8.2 Has the entity taken any steps, or does it propose to take any steps, to raise further cash to fund its operations and, if so, what are those steps and how likely does it believe that they will be successful?	
Answer: N/A	
8.8.3 Does the entity expect to be able to continue its operations and to meet its business objectives and, if so, on what basis?	
Answer: N/A	
<i>Note: where item 8.7 is less than 2 quarters, all of questions 8.8.1, 8.8.2 and 8.8.3 above must be answered.</i>	

Compliance statement

- 1 This statement has been prepared in accordance with accounting standards and policies which comply with Listing Rule 19.11A.
- 2 This statement gives a true and fair view of the matters disclosed.

Date: 29 April 2022

Notes

1. This quarterly cash flow report and the accompanying activity report provide a basis for informing the market about the entity's activities for the past quarter, how they have been financed and the effect this has had on its cash position. An entity that wishes to disclose additional information over and above the minimum required under the Listing Rules is encouraged to do so.
2. If this quarterly cash flow report has been prepared in accordance with Australian Accounting Standards, the definitions in, and provisions of, *AASB 6: Exploration for and Evaluation of Mineral Resources* and *AASB 107: Statement of Cash Flows* apply to this report. If this quarterly cash flow report has been prepared in accordance with other accounting standards agreed by ASX pursuant to Listing Rule 19.11A, the corresponding equivalent standards apply to this report.
3. Dividends received may be classified either as cash flows from operating activities or cash flows from investing activities, depending on the accounting policy of the entity.
4. If this report has been authorised for release to the market by your board of directors, you can insert here: "By the board". If it has been authorised for release to the market by a committee of your board of directors, you can insert here: "By the [name of board committee – eg Audit and Risk Committee]". If it has been authorised for release to the market by a disclosure committee, you can insert here: "By the Disclosure Committee".
5. If this report has been authorised for release to the market by your board of directors and you wish to hold yourself out as complying with recommendation 4.2 of the ASX Corporate Governance Council's *Corporate Governance Principles and Recommendations*, the board should have received a declaration from its CEO and CFO that, in their opinion, the financial records of the entity have been properly maintained, that this report complies with the appropriate accounting standards and gives a true and fair view of the cash flows of the entity, and that their opinion has been formed on the basis of a sound system of risk management and internal control which is operating effectively.
